

DMIT

Dermatoglyphics refers to the branch of science which constitutes the study of the patterns of skin (dermal ridges) present on the fingers, toes and the soles of human. Dermatoglyphics Multiple Intelligence test is a biometric assessment of the individual's fingerprints to get an insight into his brain and evaluate his inborn capability and potential.

Dr. Howard Gardner introduced in his book, 'Frames of Mind', that man has at least 9 intelligences, and everyone has different proportions of these intelligences.

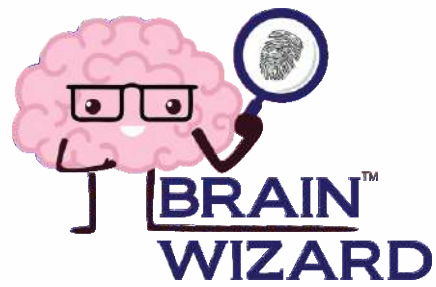

- Create • Inspire • Engage • Educate

BENEFITS

- Understand your child's hidden talent and potential
- Build confidence
- Brain lobes & Intelligences Analysis
- Improve parent-child relationships
- Understand inborn communication & learning style
- Help focus on their strengths & assets
- Know what kind of learner is your child
- Adapt suitable parenting techniques & groom effectively
- Helps in deciding career path & guides those looking for career change.

BRAIN BOOSTER TECHNIQUES

Just as we can strengthen any other muscle in our body, we can train our brain to remember more and learn anything faster.

Whether you need to study for a test, want to learn a new language, hope to avoid embarrassing memory lapses, or simply want to stay mentally sharp, improving your memory is easier than it sounds. All it takes is trying out new memorization techniques or making key adjustments in your lifestyle.

BENEFITS

- Improve memory & concentration
- Enhance confidence
- Learn complex formulae, periodic table, definitions, history dates, phone numbers, names & faces, long answers & MCQS
- Makes learning faster & smarter
- Reduces time taken for revision
- Learning made easy & stress free

Positive Parenting

POSITIVE Parenting is an idea based on the assumption that all children are born good, are altruistic and desire to do the right thing. Knowing that, we can teach and discipline them without breaking their spirit. Once you understand the logic behind your child's misbehavior you can then correct their mistaken belief about how to feel loved, powerful and valued in the world, teen years and into adulthood.

BENEFITS

- Help develop a strong emotional bond with your child
- Enhances mutual respect
- Improves self-esteem & confidence
- Understand the feelings of your child better
- Reduces power struggles
- Helps in overall character building
- Helps you raise a responsible and positive child

Psychometric Analysis

Psychometric tests are a standard and scientific method used to measure an individual's mental capability and behavioral style. Psychometric tests are designed to measure the candidate's suitability for a role based on the required personality characteristics and aptitude.

BENEFITS

- Helps analyse your strength & weakness
- Know which career are you best suited for
- Gives a snapshot of your ability & intelligence
- Know how well you can perform under adverse situations
- Identify personality traits

Midbrain Activation

The mid brain is one of the parts of the brain whose main function is to coordinate communication of auditory, motor and visual signals. The child is taken through a process of activation and learning to enable him/her enter a stage of thought genius. Genius not in terms of IQ levels but in the terms of optimal brain functionality. This means that all the senses are activated and perform at their best which includes the abilities of perception of their environment.

BENEFITS

- Identify numbers & colours blindfold
- Improve memory & concentration
- Enhances creativity & confidence
- Improves thinking ability & brain potential
- Promotes emotional stability & enables stress management
- Boosts self esteem & motivation
- Fun filled brain exercises
- Relaxation techniques and sensory perception activities to master the senses

Quantum Speed Reading

Quantum speed reading (QSR) is a completely new technique for reading book without looking at the page. It was developed in Japan and has been taught to both children and adults there for the last several years. Astonishing as it may seem to most of us who learned only to read books by reading a page at a time they can, in fact, be read by simply flipping the page

BENEFITS

- Helps in memory improvement
- Enhances concentration & visualisation
- Helps in development of precognitive ability
- Develops intuition
- Brings about emotional stability
- Enables faster reading
- Improves handwriting

Robotics Education

Building amazing Learning experiences

BRAIN WIZARD pioneers in Robotics Training, Methodology, R&D and Design Initiative in STEM Education. We provides solutions for schools in Electronics and Robotics Components, 3D Printing, Lab Equipment Setup and organizing **ROBOTICS CAMPS AND WORKSHOPS.**

JUNIOR ROBOTICS

Junior Robotics is a starter Robotics set, especially designed for Kindergarten and Early Primary school students of ages 5-8. ... It also includes robotic parts such as the Mini controller, Touch sensor, one Motor, one LED, RJ cables and USB cable.

ROBOTICS SKILL CENTER

Offer Authorized training programs to support core automation technologies and career certification.

BENEFITS

- Helps address the growing demand for teaching science, technology, engineering and maths in schools.
- Students learn the need for precise instructions.
- Prepare for a future that feels more creative and less like homework.
- Helps develop logic building and critical thinking skills.
- Improves problem solving
- Helps connect science and math concepts to the real world
- Develop teamwork and co-operative skills
- Increase maturity levels of students by preparing them for real-world situations.
